

## Central nervous system Quiz: questions and answers

1. Which parts of the body the central nervous system includes?

- Brain and spinal cord
- Hands and foot
- Lungs and kidneys

2. How many parts can be human brain divided into?

- Four parts
- Two parts
- Three parts

3. In the central nervous system, the interneuronal space is filled with a large amount of which cells?

- Skin cells
- Internal body cells
- Neuroglial cells

4. The brain consists of a cortex composed of:

- Neuron-bodies
- Brain stem
- Mid brain

5. What brings information to the central nervous system?

- Arteries
- Veins

Cranial nerves

6. What is the length of the spinal cord?

20 to 23 cm

30 to 38 cm

42 to 45 cm

7. How many nerve cells does the central nervous system have?

92 billion

86 billion

80 billion

8. What are the pairs of cranial nerves?

Spinal and radial

Olfactory and optic

Sensor and motor

9. Which two matters is the CNS divided into?

White and gray

Red and Blue

Green and Yellow

## Central nervous system Quiz: questions and answers

### Right answers

1. Which parts of the body the central nervous system includes?  
Brain and spinal cord
2. How many parts can be human brain divided into?  
Three parts
3. In the central nervous system, the interneuronal space is filled with a large amount of which cells?  
Neuroglial cells
4. The brain consists of a cortex composed of:  
Neuron-bodies
5. What brings information to the central nervous system?  
Cranial nerves
6. What is the length of the spinal cord?  
42 to 45 cm
7. How many nerve cells does the central nervous system have?  
86 billion
8. What are the pairs of cranial nerves?  
Olfactory and optic
9. Which two matters is the CNS divided into?  
White and gray
