

Geometry Quiz: questions and answers

1. What is the number of sides in a hexagon?

- 6
- 8
- 12

2. Complete the order: Million, Billion, Trillion, _____ ?

- Quadrillion
- Quintrillion
- Multi-Billion

3. What do you call somebody who works in the field of geometry?

- Geometer
- Statistician
- Mathematician

4. Which of the following field is NOT an application of geometry?

- Physics
- Art
- History

5. What is differential geometry associated with?

- Combinatorics
- Multivariate Polynomials

Calculus and Linear Algebra

6. What is a straight line or plane that touches the circumference of the circle at only one point called?

- Diameter
- Tangent
- Normal

7. What is a triangle having its at least two sides equal called?

- Equilateral triangle
- Isosceles Triangle
- Scalene Triangle

8. What is the square?

- Parallelogram
- Rhombus
- All of them

9. National Pi Day is celebrated on?

- 14 of February
- 14 of March
- 14 of August

10. Who is the father of geometry?

- Aristotle
- Euclid
- Archimedes

Geometry Quiz: questions and answers

Right answers

1. What is the number of sides in a hexagon?
6
2. Complete the order: Million, Billion, Trillion, _____ ?
Quadrillion
3. What do you call somebody who works in the field of geometry?
Geometer
4. Which of the following field is NOT an application of geometry?
History
5. What is differential geometry associated with?
Calculus and Linear Algebra
6. What is a straight line or plane that touches the circumference of the circle at only one point called?
Tangent
7. What is a triangle having its at least two sides equal called?
Isosceles Triangle
8. What is the square?
All of them
9. National Pi Day is celebrated on?
14 of March
10. Who is the father of geometry?
Euclid
