

## Glass Quiz: questions and answers

1. How many different categories of glass exist?

- 3
- 2
- 4

2. Glass is a mixture of:

- Metallic acetates
- Non-metallic silicates
- Metallic silicates

3. What changes are observed when the glass is heated?

- It solidifies
- It becomes softer
- It bursts

4. Which type of glass is used to manufacture artificial gems, bulbs, lenses, etc?

- Special glass
- Soda-lime glass
- Potash-lead glass

5. Which of the following is not a process involved in glass production?

- Extrusion
- Forming and shaping

Heat treatment

6. What is the temperature at which a non-crystalline material transforms from a supercooled liquid to rigid glass?

Glass transition temperature

Boiling point

Melting point

7. Glasses show evidence of which fractures?

Brittle

None

Ductile

8. What is the primary component of glass?

Silica

Crystal

Sand

9. What type of glass is dust-free?

Float

Jalousie

Glass block

10. Which type of glass panel is used for glass curtain wall?

20mm thick solid glass

Insulated glass

Tinted glass

## Glass Quiz: questions and answers

### Right answers

1. How many different categories of glass exist?  
3
2. Glass is a mixture of:  
Metallic silicates
3. What changes are observed when the glass is heated?  
It becomes softer
4. Which type of glass is used to manufacture artificial gems, bulbs, lenses, etc?  
Potash-lead glass
5. Which of the following is not a process involved in glass production?  
Extrusion
6. What is the temperature at which a non-crystalline material transforms from a supercooled liquid to rigid glass?  
Glass transition temperature
7. Glasses show evidence of which fractures?  
Brittle
8. What is the primary component of glass?  
Silica
9. What type of glass is dust-free?  
Float
10. Which type of glass panel is used for glass curtain wall?  
Insulated glass
