- Faint Object Spectrograph
- Wide Field Camera 3
- Advanced Camera for Surveys

5. When was the first servicing mission launched?

- 1993
- 1995

1990

6. When did the Hubble Space Telescope capture an image of a supernova which reappearance was predicted?

2014

2015

2016

7. What was the supernova discovered by Hubble Telescope named?

SN 1937C

Kepler

Refsdal

8. What is the farthest known galaxy?

Whirlpool Galaxy

Mayall's Object

GN-z11

9. When was the discovery of the farthest known galaxy announced?

2015

2016

2016

10. When was the image of Carina Nebula released?

2010

2011

2010

Hubble Space Telescope Quiz: questions and answers

Right answers

1. When was the Hubble Space Telescope launched into orbit?
1990
2. Which two institutes worked on the construction of the telescope?
Marshall Space Flight Center and Goddard Space Flight Center
3. Who built the computer systems for the telescope?
Rockwell Autonetics
4. What is displayed in the Smithsonian National Air and Space Museum?
Faint Object Spectrograph
5. When was the first servicing mission launched?
1993
6. When did the Hubble Space Telescope capture an image of a supernova which reappearance was predicted?
2015
7. What was the supernova discovered by Hubble Telescope named?
Refsdal
8. What is the farthest known galaxy?
GN-z11
9. When was the discovery of the farthest known galaxy announced?
2016
10. When was the image of Carina Nebula released?
2010
