

Periodic Table Quiz: Trivia Questions and Answers

1. Periodic table is a tabular arrangement of:

- Chemical Elements
- Metals
- Acids

2. Generally, within a row, which elements are to the right?

- Acids
- Metals
- Non Metals

3. Noble gases are in which group of the periodic table?

- 16
- 18
- 17

4. What are in Group 1 in the periodic table?

- Halogens
- Alkali Metals
- Alkaline Earth Metals

5. What is the atomic number of Rhodium?

- 23
- 45
- 21

6. When did Russian chemist Dmitri Mendeleev publish a recognizable periodic table?

- 1890
- 1869
- 1880

7. When was phosphorous discovered?

- 1649
- 1678
- 1689

8. Atomic Number 118 is:

- Oxygen
- Hydrogen
- Oganesson

9. The most electronegative and reactive metal in the atomic table is?

- Sulphur
- Chlorine
- Flourine

10. Which was the first element to be produced artificially?

- Silicon
- Technetium
- Sodium

Periodic Table Quiz: Trivia Questions and Answers

Right answers

1. Periodic table is a tabular arrangement of:
Chemical Elements
2. Generally, within a row, which elements are to the right?
Non Metals
3. Noble gases are in which group of the periodic table?
18
4. What are in Group 1 in the periodic table?
Alkali Metals
5. What is the atomic number of Rhodium?
45
6. When did Russian chemist Dmitri Mendeleev publish a recognizable periodic table?
1869
7. When was phosphorous discovered?
1649
8. Atomic Number 118 is:
Oganesson
9. The most electronegative and reactive metal in the atomic table is?
Flourine
10. Which was the first element to be produced artificially?
Technetium
